

## Lid Organizer installation instructions

Each lid organizer contains the following components:

**1** 1x Lid Organizer with hook and loop fasteners

**2** 2x Philips screws and washers + Alcohol swab

**2**

Wipe down the entire surface of the case lid with an alcohol wipe and allow to dry.

Remove the adhesive backing of the lid organizer to expose the hook and loop adhesive.

Install the lid organizer into the lid of the case.

Apply pressure around the four sides of the divider to ensure the adhesive sticks to the case. Do not remove the lid organizer for 24hrs to allow the adhesive to fully bond to the case.

Assemble the screws into the silicone washers and install into the case using a Philips head screwdriver (not included).  
 \*\*\*NANUK 920,930 and 945 cases may not have screw posts in the lid of the case. Only the hook and loop fasteners are required for these cases.

Tighten the screws until resistance is felt.  
**DO NOT OVERTIGHTEN.**
